

## Activity 2

จงพิสูจน์ โดยใช้ Direct Prove : Give a direct proof that if  $m$  and  $n$  are both perfect squares, then  $nm$  is also a perfect square. (An integer  $a$  is a perfect square if there is an integer  $b$  such that  $a = b^2$ .)

$$\text{พิสูจน์ } n = a^2$$

$$n \in \mathbb{I}$$

$$m = b^2$$

$$m \in \mathbb{I}$$

$$\text{เมื่อ } nm = (a^2)(b^2)$$

$$nm = a * a * b * b$$

$$nm = a * b * a * b \quad (\text{Commutative Law})$$

$$nm = (ab)(ab) \quad (\text{Associative Law})$$

$$nm = (ab)^2 \quad \text{โดย } a, b \in \mathbb{I}$$

$$\text{เมื่อ } a, b \in \mathbb{I} = ab \in \mathbb{I}$$

$$\text{กำหนดให้ } c = ab \quad c \in \mathbb{I}$$

$$\text{ดังนั้น } nm = c^2$$
